■ Investment Pros / Strengths Established market positioning in Nifty 100 index with active operational footprint	■ Risk Factors & Weaknesses - Return on capital employed below 10% (3.2%) suggests the business is not generating sufficient returns on invested capital - Net debt exceeding 3 times EBITDA (12.1x) is a high leverage ratio and limits financial flexibility - Revenue growing at below 5% over 5 years (-4.7%) lags inflation and suggests limited business momentum
